## LAST CHANCE LAST REASONABLE WARNING....

Two hundred and fifty years of white settlement/invasion. If we do not have an agreeable and respectable Aboriginal acknowledgement in the Australian constitution by 2020 we are a failure as a human race. It will be 250 years of injustice and barbarism, deceit, pomp and greedy neglect in the name of God, FEAR, AND SELF INTEREST...Purposeful oversight for self indulgence and suppression of what is right and arrogant persistence of what is wrong. We will have also failed the intelligence and perpetuity meter.

LAST CHANCE LAST REASONABLE WARNING....If not constituted by 2020, 250 years after ignorant white arrival to claim an already settled land for longer than any other land in existence at that time in 1770. We must not make 2020 as a celebration of Cook's arrival but as an unjust blatant ceremonial moment which simply just confirms and excasperates the truth that Aboriginals held a solid civilization for thousands of precious years and undeniably existed beyond the recognition and intelligence of the constitutional developers and those before them. It has been 250 years and still damned by lack of constitutional recognition. A despicable blight on Australia's history that must be remedied completely by 2020 for a fair celebration of 40 thousand years of taking great equilibrious care of the land, to have it torn away by stealth and mockery, by an arrogant British dynasty progressing with catastrophic by product to the earth itself, with rules on the run and poorly placed priorities. Time to wind back the time clock to justice for all by 2020 for all to celebrate. First celebrate the original caretakers of Australia who make the new current impatient civilization of progress to implosion look so destructive, implosive inevitable.

As much as we built a great but fractured nation now at tipping point, with all its progressive functions successes and failings by rules on the run, there has been one obvious accidental or on purpose oversight....Sadly...There is the beautiful natural ways of all life and love. Then there is the current human civilization that makes rules for itself at the expense of everything else..and add the word love to envy, greed and opportunity... Time for gentle responsible change for the sake of a healthy future despite the lazy..

Are we incompetent with no ability to write and agree to Aboriginal constitutional recognition and wise terminology required to bring real justice and pride to a current deficient effigy of pomposity with rules for one not the other?. Australians, particularly the current young will not be told. One does not have to take advice but it is a fool who doesn't listen!! (BAC proverb).

Australia is now almost out of the historic practise of not making a decision without first consulting at great cost an overseas expert!. Last chance by 2020 with national pride to save the wild and the dignity and law of the Australian constitution by doing what is disgracefully overdue.

The Law allows wealthy internationals to buy large tracts of land as that is in the constitution!

Is this just another predictable but gutless rebuff from the Australian Government in regard to ABORIGINALS AND THEIR PLACE IN THE Australian CONSTITUTION AND IDIOM. Their culture is the foundation to the Australian idiom. The land was taken from the Aboriginal community by the British Government 250 years ago and they were deemed expendable as the barbarism that followed highlighted. Portland Victoria. Bellingen NSW , WENTWORTH AND THOUSANDS MORE EXAMPLES. 6000 Aboriginals fought in ww1 and ww2 and on return could not get "Soldier settlement land" as THEY were not considered Australian citizens. We have brought in thousands, millions of immigrants from other cultures, religions of which all of us are or descendants of, give them a piece of wattle and a tiny certificate which makes them an Australian citizen with all rights of the Australian constitution. We only gave Aboriginals the right to vote some 45 years ago . We went to referendum to decide if they were worthy. ARROGANT POMPOUS sad historic moment.

So bloody minded, disrespectful and a blight on our SELECTIVE so called equal opportunity supposed values but sadly selective controlling, supressing, plundering, opportunistic. We seek vain winging opportunistic moments in the name of equal opportunity often without contribution and hard work.

We still are arrogant and despicable. We cant find the time and place to bring dignity to all equilibrrious Aboriginal first peoples after almost 250 years....But we can hold a trendy rushed plebocide postal vote to decide if same sex marriage is agreeable, to appease a PLAYGROUND TRENDY section of the vote. We can vote to allow destructive, filthy lazy, poor mentor, mentally degrading dogs to be kept in rented homes and properties to further build numbers for profit and a rush of grubby money. Just to impose overpopulations of billions of dogs and cats by supposed animal loving owners, that require over a billion other animals and creatures slaughtered without mercy a week to feed them FOR PROFITEERING TO BOOST THE FALSE ECONOMY WHICH IS DESTRUCTIVE AND INDULGENT.

All this while we stand by as a whole and see the wild in the wild and pure habitat exterminated off the planet with great speed and often glee.. We endeavoured to dispose/ exterminate the Aboriginal race from 1770 for some 200 years. Sadly some white trash still feel that way. We now want the wild in the wild and wild habitat exterminated for the same greedy self interested reasons with the same arrogant determination to see that it happens .With condoned it seems billions of dollars wild life crime as stealthy from the wealthy, ignorant, comfortable or destitute.. and human dumb. It is expected the wild in the wild will be gone within ten years. Such and incredible legacy for new generations ..who may not even care. For nearly 200 YEARS Aboriginality purposely and barbarically gradually tortured off the planet, now the wild to suffer the same fate to the demise of intelligence with all life. Evolved over millions of years taken out in 50 to 100 damning, greedy arrogant years.

The Australian Governments cant even address intelligently the climate issue with going forward sustainably, species extinction, out of control science and technology, overpopulations of hoofed and other favoured animals and humans. They now have got themselves on the UN HUMAN RIGHTS COMMITTEE....Must be paying for that in some unscrupulous way.!!.. Contamination to seas, rivers, lakes, soils, air and water, gluttony, indulgence, drug addiction. Degradation of the Great Barrier reef..but we can flood the catastrophic numbers of dogs and cats for profit despite

ugly certain outcomes for everything. Isn't it interesting that drug addicts bleat.. "Everybody does it". People who lie, cheat and steal bleat "Everybody does it". Alcoholics say "Everybody does it". People who own dogs say "Everybody loves them"..when the dog bites "Its not the dogs fault its someone elses". AND ALL SAY "ITS NOT MY FAULT IT IS SOMEONE ELSE'S"

Favoured equal opportunity is often given as a front to spoilt, playground envy, jealousy, CONVENIENCE, POLITICAL POWER SEEKING, money, greed, revenge, if it only suits my moment, trend, whim...

Interesting same sex marriages, dog/cat proliferation are flooded as saviours of the human economy. This is the best this grasping clever civilization can come up with while demeaning and ignoring the rights of the ABORIGINAL COMMUNITY AND DYNASTY AS THE FIRST PEOPLE AND RIGHTFULL CLAIM TO THE PROUD HERITAGE OF THIS OUR COUNTRY NOW..Consolidation now please... It is nearly to late and unforgivable if constitutional reform for the rights of the first peoples is not addressed now and concluded by 2020 for a proud conclusive celebration for all...on this continent. All past is lame without this conclusion.

Put aside parliamentary puppetry for big business and gutless hedging and deceit for dignity not pomposity AND OFFER ALL AUSTRALIANS A REASON TO CELEBRATE WITH PRIDE.

2020 must not be the celebration of just CAPTAIN COOK LANDING IN THIS CONTINENT OF WHICH WAS ALREADY DISCOVERED AND SETTLED FOR THOUSANDS OF YEARS. BUT SEEK RESPECTFUL ACKNOWLEDGEMENT AS WRITTEN FORMALITY OF THE EXISTANCE OF THE GREAT ABORIGINAL FAMILY IN THIS COUNTRY BEFORE 1770, THEN AND TILL NOW overlooked, "fanudged" like schoolboys in a segregated playground.

How can you consider Australia a republic when you stubbornly wont recognise first peoples in the constitution after 250 years of occupation and hijacking their country while celebrating as Australia Day..Dont like being told even if "right" is staring them in the face.."Right is what is left over after all the wrong has been done" ...Robin Williams.....I would expect any gay Aboriginals would much prefer security of the wild in the wild, Aboriginal inclusion in the Australian constitution before a rushed postal vote on "Trivial in comparison" same sex marriage..at least I would hope so..as putting gay marriage before Australian constitutional Aboriginal is formalized, is like putting dogs, cats, cigarettes, lying, cheating, stealing , drugs and liquor by anyone, before food and water and what is fair and real for an earth caring life.. Although we do appear to live in a civilization of take, want, greed and self interest.

We have just given 12000 refugees special status to live in Australia and yet Aboriginals our first peoples are deprived of constitutional rights and recognition.

Equal opportunity...

Most people want late model cars a big house now, boat, caravan, motor bike, caravan, all mod con appliances, tickets to everything, annual overseas trips...more, more, more and now.....

If all was equal Martin Bryant would have gone to Port Arthur to arm wrestle with intended victims.!!!!!! A group class action of American children is taking the U.S Government to supreme court to sue them for denying the children their future, by the Governments inaction on climate change. Interesting and timely.

Some great thinkers find equal opportunity a human envy circus at the expense of the planet and all good health...Viruses and Bacteria will always be smarter..

2020 is final notice or else. 250 years is long enough to show remarkable patience. We will become lost idiots beyond that.

I wrote this in 2000 and it was published in my book "Forthright messages" in 2001.
