

"WALK FOR THE WILD"

DOGS AND CATS MAKE US LAUGH OUT LOUD!

should be..DOGS AND CATS MAKE THE WILD CRY OUT LOUD AND.."DEAD"!!!

THE TRUTH...

- ...Turn back yards into stinking bacterial e.coli piddle poop cess pools.
- ...Home or rentals into smelly dog kennels
- ... Taking dogs for walks a misnomer. Most dogs not taken for a walk but to sniff up peoples groins , piddle/poop on all others space. Sniff people and places for piddle, poop, balls, fanny, shag, poop, dead and submission of others.
- ..Impose dogs on every one else and dogs become unpredictable, sulky and aggressive like their owners if rejected..100 000 dog attacks each year in Australia. 30.000 requiring serious medical/hospital attention .Several vicious toddler deaths.
- ...600 million dogs and six hundred million cats in the world increasing fast.
- ...One billion spoilt pampered useless dogs and cats with diseases and complaints built in, now being fed more nutritious food than a third of the worlds human population.
- ...A billion people starving each year. 25 thousand children die each day from starvation.
- ...30 million dogs and cats slaughtering 130 million wild creatures a day in Australia. 50 billion viciously slaughtered with no mercy each year. Wild in wild gone in 10 to 15 years.
- ...Up to 60% dog returns or dumped after the truth of dogs is discovered. The financial, cost, the filth the catastrophe to wild life which is connected to our very own human survival.
- ...Ten years ago the Seafood industry only took the seafood catch for humans, now take the lot to put into cans for spoilt cats and dogs.
- ...Pet food industry now bulldozing forests all over the world to grow more hoofed meat for food for discerning wanking dogs and cats.
- ...Food and water wars now brought forward 20 years.
- ..Unconditional love bu...t 100 billion dollars a year spent on cats and dogs world wide. More services and research to save hybrid smelly dolly dogs than put into saving anything else.
- ...Dog poop cess pools in home back yards and fermenting in the billions in little plastic bags poisoning/contaminating our oceans, rivers, streams and seas (many examples).
- ...Bacterial e.colli highest level in dog poo now being left by many in the streets and shopping centres.
- ...Dogs will bite rush or growl if they do not get their way. I am not a dog like many others, so I object if a dog tries to sniff me up..after nuzzling its nose in turds and licking its and others bum for an hour.This is the level dog owners have sunk to...
- .. Where is the book that says everyone should love my dog, lick my dogs b...m and provide some sexual stimulation/over intimacy to my dog.. ? Get a life..get out of the gutter.
- .. The Pet industry and those requiring therapy are the only ones who would repeat that every body loves dogs and cats..The wild and those with some dignity who care about the wild don't!!!!.. See a therapist .Get an earth useful hobby and life. A million to choose from. Help save yourself..Kick your own ar...e.
- ...Stink up shop fronts and footpaths with piddle.
- ...Most owners with dogs look moronic and so subservient.
- ..Humans with dogs become subservient to dogs.. The mental and objective human decline.
- ...Most people who buy a dog or conned into having one by shifty animal agencies have 10% of their brain go missing and most of their dignity as the home becomes filthy and contaminated.

...All home activities revolve around dog so it gets its way.

...Fluffy brains say "Dogs are born to love...Humans have to learn to love" but... If you did not feed a dog, pat it, rub its pleasurable places to make you and it happy and left the side gate open it would be gone to the next one who did..

..Dogs and cats are on the hunt the minute they go out the front door. The remains of 30 native creatures in one feral cats stomach in WA research venue. Farmers federation says people will be killed by dangerous feral and pack domestic dogs soon.

...\$1500 a year plus to care for one dog...Now shifty greedy insurance companies with fluffy images conning all to take out pet insurance..It is an anti wild scam..

...None of what is real is offered by the media, animal agencies. It is about bang for bucks and seriously anti wild. They do not really care about the wild.

...Wild in the wild expected to be gone in 10 to 15 years from mine and others research. David Attenborough suggests 10 to 12 years world wide. The human race with its earth pillaging for greed and thoughtless comfort will be held accountable as we humans implode. It does not have to be. A warning now. The wild millions of years to evolve and survive..50 to 100 years for this civilization to make over 90% extinct.

...Dog breeders supported it seems by animal and vet industry watching diseases built into dogs and cats for good commercial turnover.

...Human over intimacy with dogs and cats not mentally and physically healthy...

..People not liking cats and dogs is not a phobia but common sense.

..Have never met any one who grew smarter owning a dog.

..If you think having a dog that eats its own and others piddle and poop is healthy in your home, see a therapist.

...Dog is poor filthy, stinking, lazy, angry, unpredictable, poor role model for the young or depressed. Can develop lazy "wag my tail" arrogant tendencies from poor role model.

FOR A WELL RESEARCHED 30 PAGE email document on the subject of "Walk for the wild" please email me and I will forward it to you. brian_carter1942@hotmail.comIF you can think and really care.

...A moccasin with a rotting T bone steak inside with smarties for eyes and jelly bean for a heart would be more value to the earth than both Johnny Depp his girlfriend and their dumb dolly dogs.!! mmmm.

..50 years ago and beyond, the dog lived in the back yard and respect was offered to visitors by tying the dog in the back yard when they arrived. Dog now lives in smelly dog kennel house often eating its or other dogs poo. Allowed to eat at dinner table, jumps all over visitors. Visitors expected to kiss dogs b..m as it sniffs them up the groin and elsewhere. Visitors way below dog in pecking order with owners.

..Dog poor role model replacement. Stink, poop, piddle the yard, do nothing, lazy, get everything it wants with wag of tail, everything is done for the dog. Pampered and takes over the house. Rubs and massages and pats ahead of family and friends. Dogs expect all the attention when it wants it. Over intimate rubbing pleases both.. Mysterious and known physical/mental health issues arise from living filthy and subordinate to the dog.

Why do some men and women act like mongrels? ..Probably raised by parents with the dog as a role model.. Now still subordinate to their own dogs and its behaviour.

Change urgently required within the next ten years commencing from now 2015. Must reduce domestic dog and cat numbers by 600 million by then and all destructive to the earth feral creatures.

Reduce pressure and invasion of seafood stocks. Change dependence and perpetuity values. Stop bulldozing wild forests, plant trillions of trees for hundreds of new wild forests. All cropping grazing farms to have shelter and all life supporting tree /habitat corridors and belts to lift air and real life production and quality. Limit large food herd hooved animals compacting and losing topsoil...

Just a start with retardant and ceiling on human populations and the greed of the wealthy and support the generous and kind.

Change to sustainable all life on earth target.. Already well directed in some areas.

Who would have thought 25 years ago we would be separating our waste in the kitchen to 3 bins.

Would've been tar'd and feathered then.
