

Developed by Mr B over 5 years.

The world needs an anthem to bless and celebrate the earth,
give thanks and seek forgiveness for destructive elements
constantly imposed on the planet and ever increasing creature
and plant extermination.

Water, air and soil contamination to facilitate our indulgent
comfort and greed...The world needs a unifying Rock Symphony
to help continue the gentling down
of human extortion of the planet...Just a quiet "Sorry"
can prevent violence, hate and lack of trust...
