## "REAL EARTH FORTHRIGHT INTELLIGENCE..... Truth"

TO ALL WHO CARE.....

UNIFY NOT SPLINTER, RETAIN CULTURAL PEACEFUL TRADITIONS.

Going out to all the world.....

The attachments show where Australia was in the 40s, 50s, 60s, 70s, as South Australia and other parts of Australia were expected to be desertified by now ,if a few of us, despite great angst and threats had worked hard to change destructive farm/land /water management practices and bulk dumb dependence on fast poison and fertiliser....offered by out of control for profit science.

**DUMBING DOWN OF A SEEMINGLY INBRED, POMPOUS, UNGRACIOUS CIVILIZATION INTENT ON DESTROYING ITSELF.**

Where we are now, and where we will rapidly end if we don't put the brakes on gluttony, bulldoze, take, greed, whim, cheap trend, rapid speed to oblivion if we don't change to sustainable direction within the next five years. IN BRIEF....as I can make it....

I HAVE BEEN INVOLVED IN DESIRABLE ENVIRONMENTAL CHANGE FOR THE HEALTH OF THE EARTH FOR 55 YEARS. Google "Brian Carter pioneer urban forest"...

Have had so much warning about the tragic outcome from indulgent ways and poisoning energy supply.

Ten years ago a film sponsored by 88000 PPR GROUP STAFF titled "HOME" which ESPOUSED THE MIRACLE OF LIFE ON THIS EARTH OUR HOME and problems now faced. It was generally only

available to Earthcare outlets to sell for \$2. Main stream media, movie houses showed little interest.

The earth originally imprisoned the carbon in the earth, the plants and plankton. Plant life arrived over millions of years and altered the poisonous carbon atmosphere. We are now reversing it back to that highly toxic position before the earth stabilised the carbon and methane into the earth after it dominated the atmosphere and nothing survived.

It took 4 billion years to provide trees, plants to feed on carbon, methane creating the healthy earth atmosphere we KNOW AND INHERITED, before we stole it from the Aboriginal cultures as they gracefully, intelligently, humbly cared for it for around 50 000 years up to then.

We have over 30 million dogs and cats, rapidly increasing for profit, slaughtering over 100 million native creatures a day in Australia. The bottom line of the food chain, the pollinators.. birds, bees, wasps, butterflies, with human help.. A world wide problem generally ignored in favour of a frivolous cheap dog/ cat story every minute of the day...more and more dogs, cats, hooved animals simply results in more extravagant, catastrophic volumes of carbon, methane , nitrous oxide ...We really are that stupid.

Criminal poaching stupidity of wild creatures from the bush everywhere to sell to other idiot humans with too much money and lower form of intelligence below dog brain. Breeding up for profit literally already retarded inferior favoured animals such as sheep, cattle, goats, dogs, cats and of course humans to literally unbalanced, catastrophic overpopulation, unequalibrious numbers for profit. Now spewing further extreme volumes of carbon , methane, nitrous oxide, into our atmosphere as we extract outrageous, illiterate and devious billions of tonnes of coal, extracted for profit and big picture ignorance to insane levels of further carbon. Burn off every where to save property as the extreme burning off actually increases the carbon problem as the balance of oxygen and carbon supply healthy ratio is now deeply fractured... yes by us!!! As does billions of fossil fuel motor vehicles . We are actually a civilization on a rapid self destructive course but we want to take everything with us as selfish and ignorant, vindictive as we will be shown to be. If you were in primary school there would be a dunces corner for such stupidity.

Interesting isn't it, huge political publicity and anger at live sheep deaths while at the same time taking out the wild creatures in multi millions and all wild habitat by stealth as pre cursor to eliminating self. Dah While replacing wild with catastrophic overpopulations of cats and dogs, and favoured hooved animals to become last ditch food for self condemned human race via A grade highly qualified shot to the head. Dunce of the earth. The by product of this lunacy is extermination of the wild with a few remnant wild creatures in small Zoos for viewing at cost. Big money thrown now at Barrier reef.. Money solves everything to fools and will make a political show but not retarding of human overpopulation, the overpopulation of favoured dolly animals and not turning the tap off the extraction of coal is such an inferior imbecilic action of inaction!!!! The earth takes no prisoners of human folly. A GREAT GOVERNMENT IN THESE TIMES WOULD HAVE RAPID WISE SUSTAINABLE CONSOLIDATION. Rapid, cautious, smart shift in job development to all purpose sustainable proud, earth friendly, human occupation and worship for human, all life perpetuity and co existence..

IF'S, BUT'S, MISTAKES, LIES.....Damage mode is todays green light to lie, and blame everybody else for all wrong doing . Sadly even Presidents lie..Nixon, Clinton, Trump...even a few Aussie Prime ministers and politicians KNOWN TO LIE for self preservation. Damage mode Dah..We need people who wont lie and uncorruptable..... THEY ARE OUT THERE.....

Humans create the markets for wildlife and other criminality for greed stupidity and desperation, often as a result of neglect and just dumbing down.

A now dangerously contaminated atmosphere warming the climate , the oceans , melting ice caps to damage and destroy everything and most species the earth took billions of years to evolve, then survived millions more. Now we are rapidly on the cusp of destroying all that which actually supports our healthy existence, within 10 years. What a dumb legacy.. All for the favour only of the arrogant, rich, barbaric to their ultimate demise also...

The 100% choking almost here. The increased heat, contaminated water, food shortages. Limited vegetation, trees with our ocean plankton stumbling now to provide the fresh oxygen everything requires and keep super volumes of carbon and other toxic gasses polluting the atmosphere IN THE GROUND AND PLANTS WHERE IT BELONGS in our rush to be smart. DAH. Or as I describe "KNOW ALL KNOW NOTHING RULES ON THE RUN".. ALL BEING POISONED, BULLDOZED FROM ITS PRIMARY PURPOSE WHICH WAS TO KEEP THE EARTH AND ALL OF US HEALTHY.

Further bad news for a dumbing down, now becoming vagrant, supposedly ever clever civilization...Several "Time bomb Methane lakes" in volcanoes in Siberia, Northern Russia Previously covered with many metres of perma frost/ ice are now melting at some 10 metres a year. Methane gas is 20 times more catastrophically powerfully toxic than carbon with unthinkable repercussions. At current rate of carbon release resulting in rapid melting of ice caps on Methane lakes it could be released in about 15 years at earliest. Unless we rapidly, wisely slow down and stop ice melting in the current destabilising manner and rush to sustainable energy, transport, homes, food, water, soil air. Plant billions of trees within the next 5 to 10 years back into damaged land. Build more modest shelters. Cap populations of humans and favoured dolly creatures for profit. No one owns the land we are just caretakers and the landlord is now planning to throw us off as disgusting tenants.. Develop equilibrium again between humans, plants and animals in fair sustainable ratio for all.....

This somewhat lazy civilization will probably wait till to late and then try and design a large refrigerator system powered by methane to keep frozen a thick ice cap over the captured methane. While preparing to leave earth for a space station to nowhere. To many star wars and flash Gordon movies.

We are in the home straight. We either fall over before the finish or we run a wise, caring race and win just in time with much pride and credibility left.

With all this and an overload of warning signs world wide.. Worth taking a step back for much less. Before a sad plunge into unbearable darkness. Time to gentle down, consolidate, don't you think. I beg of you all....

Genius of music, theatre, sport, transport, industry, agriculture plus. Change to clean transport with the good sustainable inventions of the past. Good science, recreation sport.....But stop the fracture of the planet now. Change or drop away in pain like a bad smell. With all the beautiful things we do and the earth provides it would be a violation of genius to lose it all with a gigantic slander against the earth by exterminating all the wild in the wild and smothering the earth with excessive carbon, methane, nitrous oxide, stupidity, neglect and the filth of our own excesses of human and dogs, cats, hooped animals high bacterial filth and our mental excreta and stupidity.

SHAME TO BLOW ALL THE GENIUS OUT THE WINDOW BECAUSE OF AN IMPORTANT LUNATIC "OOPS" SURVIVAL OVERSIGHT, blithering greedy, MISTAKE WHEN WE MUST COMPLY WITH THE EARTHS DEMANDS. For all life to continue to exist in good health and objective survival reality.

IN BRIEF.....

Human nutcases...We have what will be a devastating outcome from high carbon, methane, bacterial ecolli and rampant bacteria, viruses fed by human ignorant manipulation and folly.. So we breed up overpopulations of millions more human, dogs, cats, hooped animals to produce greater

toxic levels of methane , carbon, nitrous oxide, rampant bacteria and virus, methane. On top of existing danger tipping points. We spoil these sheep and other hoofed animals, poultry taking up more wild forest land before we cut their throats in the name of animal welfare, much of them with huge volumes of disappearing seafood to feed 1.3 billion lazy dirty layabout dolly dogs and cats to feed them as a weak insecure crutch for weak insecure fractured humans.  
CONGRATULATIONS YOU IDIOTS...

Amongst the brilliant achievements we have a history of filth, disease, lazy, fast food, neglect, temples to self and pseudo gods to serve power, violence. Big picture short term economic wealth and then failure...We have the capacity to be better than all that, but sadly need to kick our own butts and lower our eyes and re connect our brains....to more gentle moment.

PANDERING TO RAPIDLY BECOMING OBSOLETE, BADLY FRACTURED ECONOMY..... CURRENT, COMFORTABLE PEOPLE AND CURRENT DESPERATE POOR HUNGRY, CRIMINAL, LAZY DONT CARE...FOR THOSE REASONS.....

As French President Emmanuel Macron espoused on the 6th May 2018....

"THERE IS NO PLAN B NOW...THERE IS NO PLANET B!!!".

BAC.."More of the give and repair. Less on the take, Less on the want"

BRIAN A CARTER 0438047546
