"WALK FOR THE WILD"

A3...WARNING EXPRESSIONS OF EXASPERATION ARE RECORDED AND TONED DOWN IN THIS A3 piece..."Walk for the wild" Underbelly wild life extermination...criminal. This A3 is part of a 28 page report offered 4 years ago...

6.....USEFUL STATISTICS

According to some estimates there is probably 600 million dogs and 600 million domestic cats in the world today. In 1997 more than 700 patients reported, suffered 800 significant bite wounds at Canberra Hospital. The study was taken to predict the effect of rabies spread if it got into the country. Around the same time predictions were that some 3000 people would have died from rabies if it got into Australia before any control measures could be taken especially given the huge numbers of wild/feral cats and dogs and other invasive ferals roaming Australia out of control. With no real plan to eradicate. Two thirds of bites were inflicted by dogs and cats, 15 percent by rats/mice and 3 percent horses/donkeys/cattle ...the same percentage as humans. 25% dog bite victims were children under 12 years. 37% were to face head and neck. Usually the family pet involved. Dog bite annual rate of 184 per 100 000 people. Hospitals could be handling over 30 000 dog bites over all of Australia. Estimated dog population in Australia in 1986 was 2.6 million. One dog for every 6 people. Probably MILLIONS MORE THAN THAT that now. Around 10 million. 2012. One dog in 40 inflicted serious wounds (Canberra).

Dog attacks reported and requiring hospital attention in New South Wales Australia July 1 2005 to Nov 15 2006. Akits 2..American Pit Bull Terrier 26.. Pit Bull 133... Bull Terrier 74... Beagle 3... Border Collie 49... Boxer 39.. Bulldog 3..Bull Arab 4...Cattle dog 208... Chihuahua 17...Corgie 5...Dalmation 5...Dingo 20...Doberman 13 ...German shepherd 166... Basenji 1...Beigian shepherd 2...Heeler 2...Husky 53...Jack

Russell 46...Great Dane 23...Geyhound 9...Golden retriever 3...Kelpie 100...Labrador 83...Labradoodle 1...Malamute 42...Mastiff 46...Marema 1...Napolean mastiff 1...Bull Mastiff 90...Old English sheep dog 5...Sheep dog 2...Pomeranian 1...Poodle 4...Rhodesian Ridgeback 54... Rottweiler 173...Spaniel 1...Schnauzers 1...Sharp 1 ...Shar-Pei 1...Shitzu 1...Staffordshire 279...American Staffordshire 58...English Staffordshire 1...Terrier 66...Fox Terrier 14...Silky Terrier 9...Maltese Terrier 41... Scottish Terrier 3... Unknown 338...Wolf Hound 1..Irish Wolf hound 1... Total 2325.. How many useless hybrids are now available to gullable insecure people in the world..probably tens of thousands of useless living security blankets/dolls!!!...."Oh isnt it a cute puppy!! Then lost interest in the dog at 12 months...Same with human baby...humans all balloon and bubble when a baby of any sort arrives. After one to five years some 60% or more have lost interest in caring for the child as the bubble wears off quickly. Many people keep more than one dog, often three to five and some even hoard dozens..(Refer sick "Animal hoarding" TV program) .All mostly inside..So our homes and rentals are now, and further becoming smelly dog kennels..It is only the owners who dont smell the reeking unsanitised, disease breeding stench of dogs and cats in their home now smelling like this themselves.

Keeping track of cats is a difficult task for Brisbane City Council officers with just 20 000 felines registered after mandatory registration was brought in two years ago.. There are 95 000 dogs registered in Brisbane and probably another 95 000 unregistered...

Currently in most Dog and cat shelters 10% of dogs and 50% of cats are euthanased...Insight TV program...A hybrid dog called a Pugalea!!!.(Save me)..Labradoodle...Dropdoodle, Myxymoplastshit, Faceuglierthabottomboxer, Boxerdick, Daldysentry, Daxundupya, Bassetmoreuselessthanever (BMUTE)bloody hell!!

No person in the United States has ever been convicted of a crime for firing a gun or using any other weapon to stop or kill a dog that was attacking him or her.

California court of appeal explained...."We recognize the common tendency to anthropomorphize animals, especially beloved pets. Although we might give a dog a name and ascribe a certain personality to the animal, the law does not recognize dogs as having the mental state that can incur criminal liability".(An Orangatang now has been given human status by a court so that it can be released from a confined zoo...probably die now from lack of habitat). Author note...But should be viewed as criminally instinctive liability imposed on others by owner or dog in public or when exposed to humans in own place of confinement without warning, suitable defence, on fence and gate or by owner responsibility...!!! Florida dog bite laws have been changed so that prior vicious tendencies may no longer be needed to prove owner liability...In Texas ..."The owner of a dog that causes serious death or serious bodily harm may be charged with a second or third degree felony when the attack takes place outside the dogs normal place of confinement. In California owners are liable to massive civil liability for attacks by their dogs. The State allows the victim to sue on two strict liability courses of action arising out of a single attack...Regulations based on"Menacing dogs"...based on the finding that "dangerous and vicious dogs" have become a serious widespread threat to the safety and welfare of the citizens of the State...To help implement it, the Judicial Council of California promulgated a package of four forms in 1990..The notice hearing bears the warning.."DO NOT BRING THE DOG TO THE HEARING"...

24 19 12..QLD.Central Coast local 7 news..6.05 pm. Three different dog attacks reported at once. (1)Two labrador cross dogs attacking neighbours pets... three other dogs not identified still not caught and roaming free. vicious attacks. (2) Seniors small dog/pet attacked and killed by 2 ugly big vicious dogs..(3) Police catch two other dogs who attacked and killed dog and wounded owner two weeks earlier. Dogs now put down...a fitting end to useless moment with heartbreaking outcome..and on and on and on...

All the public should not have to know a 20 page book on how to be safe in the company of a another's and own dog in public or on private land. At your friends barbecue or just visiting...Tie the LAZY, SHIFTY, cringing, wimpy or sly dog up...

31. 10. 12 TV News. Sydney boy has ear sewn back on after pit bull attack...Dog attacks are all the time now.....

2% of US population bitten each year. by dogs..17 fatalities a year an increase to 26 in 2000. Nearly 6 million bites a year now. 17% from pet of fancy or friends pet.

CARBON FOOTPRINT...Dogs eat meat. Carbon environmental footprint to provide food for cats and dogs is equivalent to two land cruisers footprint a year... to feed one dog. The more you molly coddle the more unexpected aggression they will show...

Sixty three percent pet ownership in Australia. Thirty three million pets in Australia...World food bowl empty 25 years earlier because of greed, ignorance, spoilt, insecurity and huge overflow of favoured animals who really offer nothing and being bred to offer even less. Ah the wisdom of it all "NEWS" Five cute Bengal kittens for sale and star attraction on the catwalk.. Domestic feline bred with an Asian leopard cat...bloody hell. Impulse buying.. That will be next reality TV show..."Cats and dogs on the cat walk...sponsored/subsidised by pet food and breeding industry to sell more moronic dogs and cats while destroying human wisdom. Headline on TV Sunrise..."The dog forced onto a diet..21.9.12 ..Obie the fat...disgraceful, indulgent dog with highly stupid owner. Cat 30 kilograms overweight....Both owner and dog even more useless. One only has to view the dumbing down of everything in the TV show ..."Animal hoardings".. If the owner died and they were all locked in the house....within 2 to 3 days as the body started to change and the dogs became hungry and agitated there would only be human bones and a few dead dog carcasses as the dogs/cats fought, killed and ate each other and their dead owner for a feed..The Australia Zoo Wildlife hospital receives close to 100 calls a day for injured wildlife admitting around 30 species each day. With around 100 Koalas in care all the time.. Many injured by cars but you can bet many also injured from attacks by cats, dogs and foxes as well as farm and industrial machinery and precincts..guns etc.

7.....THE ROOTS OF OUR SANITARY SEWERS.

It is believed by most of our great thinkers that the sewer system, taking away human waste was the greatest, most important invention/evolution of this modern dynasty.

....The Roman Empire fell in early CE along with concept of baths, basic sanitation , aqueducts, engineered water or sewer systems etc.

...Deuteronomic Code (Deut 23:13) followed.."and you shall have a stick with your weapons and when you sit down outside, you shall dig a hole with it and turn back and cover up your excrement"...This is thought by many to be the first recorded instruction to mankind regarding sanitation/hygiene.

...Sanitation reverted back to the basics.

...During the so called "Dark ages" there arose a brotherhood among men noted for skill in combat. There also developed a creed that uncleanness was next to godliness. As such bathing/sanitation became quite uncommon; homes towns and streams became filthy..

....Diseases were common place; epidemics decimated towns and villages. 25%(or more) of the Ancient European population died of disease poor sanitation (cholera, plague etc) The major transmitter of the plague was rats(actully bacteria being conveyed from rats to people via fleas bites) Dogs and cats no doubt playing their awful part. All thrived amongst the stench and mess common place in medievil times..

....The awakening was slow.

....During the 1500s the Reformation slowed progress.....Bodily functions were performed anywhere/ anytime. The British royal court posted a warning (1589) "Let no one, whoever, he may be, before, at, or after meals, early or late, foul the staircases, corridors or closets with urine or other filth".

...Larger European cities...dreadful filth and stench were evident almost everywhere.

...Cesspools for human wastes were frequently placed under the floors of castles. In 1183, when the Emperor of the holy Roman Empire held a diet/Banquet+... in the palace of Efurt, the floor of the main hall broke...many of the dinner guests fell into the cesspool and drowned. In England in 1326 Richard the Raker had just been seated for a meal when the wood floor gave away...drowning him.. Chamber pots were often used..

....Early sewers were the rivers, streams and oceans...

...Night soil removal evolved.

...Plumbing began appearing but not for Sewers as public parks were fouled by human and dog/horse/animal waste.

...Huge steps have been taken to now BUILD new and bigger sewers and began appearing around the 1840s. Paris had 500 km of Sewer by 1930...These were designed 6 feet in height to convey refuse, animal wastes, human untreated wastes etc into rivers and streams..from off the street....not the best outcome.

...It was not till the late 1800s the connection between human wastes and disease finally began to be understood.

...In the late 1800s a plumber named Thomas Crapper was able to enhance the toilet seat design as the forerunner to the modern day toilet by patenting it in 1891.

...The great plague of 1665 killed some 60 000 people in six months.

...By the early 1700s nearly every home had a cesspool beneath it... and the foul, often deadly odours were killing many. Bad air with congestion and sneezing preceeded death.

...Cholera epidemics(1830s 1840s and 1850s) awakened the need for sewers. Just like many homes today.. Current health report...The worst unhealthiest place you can be is in your own home.

...It was an infectious cesspool everywhere and in the mid 1880s the link between bacteria and infectious diseases was beginning to be understood.

...Pests and potential and existing diseases carried by dogs such as lice, mutata all the time till the remedies of old and new are useless....

Unthinkable ramifications if a viral or infectious "Rambo" arrives and it will... We have contaminated all our perfect needs...Water, air, soil, food. This fabricated and fractured environment unless consolidated and balanced, will bring undeniable wrath unheard of before....

...We have seen our own human populations rise from one to seven billion in 70 years..many great plagued dynasties have fallen by losing sight in their indulgence of past mistakes.

..If Aliens observed earth for a month they would send a peaceful delegation down to meet with the dogs in charge to discuss all possible trade and amiable or otherwise links. They would disregard the subservient humans.

...Dogs/cats like a virus that can take out one in 5 of family every year but keep it cause its cute and fluffy and always dependant on your existance for sad reasons...but the dog likes me...judged by who?

...Yantze river poluted..by humans and animals...dogs..One in 15 people in the world depend on it for drinking water.

... We cleared up the human excreta/sanitation problem then bred up 1.2 billion dogs and cats to poop, piddle and foul our environment with the highest ecolli levels.

8.....MY EXPERIENCE

I was born in Mildura, lived in Merbein West the son of a Blockie... on the Murray river in 1942...Dogs were work or security animals and would never be allowed near the house and if we played with them we had to wash our hands clean before we ate and not put our hands near our mouths as the dog would constantly roll in the cow poop and any dead animals they found. If we swam in the dams, rivers or channells we were taught to wipe our eyes and ears dry and clean quickly first as disease and sanitation were only now being practised by some. Following many silent unknown peculiar deaths others got strangely sick and maybe died. We were discouraged from playing with dogs or cats at that time because dogs were known to carry life threatening diseases at that time, (Cemetaries are full of young and old that did or may have died from dog association) such as dysentery, ring worm, hyadatid, hookworm, even diahrea could be fatal..with many many stomach bugs and the known and unknown diseases from their general dirty habits still around today and still unknown and unclear....They ate only the scraps or rabbits and some fish and animal offal was offered. They killed many wild creatures and started the wild dogs that threaten the wildlife and farm animals today..Our dogs name was Tinker and Dad ran over him on the tractor driving thru a dust storm searching for his children coming home from school. We had one cat and any newborn kittens were drowned quickly in a bag in the dam and buried. We had nothing to feed them and they would have eaten everthing they could find in a non choosey fashion wiping out all birds and native creatures.

We moved to Footscray and Dad obtained a dog which we called Butch. A Heeler/ Sausage dog cross. A small but feisty dog... Here in Footscray he was only allowed into the back room only on cracker night or thunderstorms as he would try to scratch the back door down... Small as he was we had trouble keeping him in. When the bitches were on heat he would tear the bottom of a paling and get under the fence or just jump up to the top of the high front gate and pull himself over, just because he could and off he would go. I would have to head off on my bike to find him. One day I found him trembling with 2 other small dogs on the side of the road. Some large dead dogs on the side of the road nearby..Seems according to witnesses, the 3 dogs being small could not get a crack at the bitch on heat. All were following and were some 30 meteres behind hoping for a chance when the large pack of big dogs strolled out onto the road with their minds elsewhere and were all killed by a truck passing by...I could often follow the trail of poop and piddle on or near the footpath when I was looking for them as all the loose dogs which were most of them, would follow general poop and piddle smelly filth trails..It was quite a

stench. Butch used to sit on my shoulders when I was 15/16 years of age and I would ride from West Footscray to Essendon Airport to see the Aeroplanes and back with him on my shoulder. Butch stayed with Mum and Dad after we all left home. Both my brother Graham and I started work on our 14th birthday. Butch was put down after contracting serious consumption at 14 years..

Cats also roamed everywhere. It was the first time I saw a catskin rug in a home at that time. Liked the idea ever since as a cat control method. All the stray cats dissappeared and if you wanted a cat you kept control of it as they were pests on others property. I never owned a dog again...I had two cats with 2 wives in the next 6 years. Nickademus and Madagascar...I liked both those cats... You were expected to lock a cat up when you shifted and my second wife would not allow it in the house so I locked it in the shed..Each time we let it out it dissappeared to where we lived before near the beach and rats and wild creatures including birds. I have not had a cat since I saw a supposedly little fluffy, wouldn't hurt anything cat with a bird in its mouth playing with it for an hour then killing it and leaving it..Saw hundreds of wild feral cats in the middle of Australia hundreds of miles from anywhere, hunting small beautifull Australian creatures now threatened with extinction.

I used to see and hear koalas regularly around Mt Eliza/Frankston/Mornington in 70s...Los to dogs and cars...

A work mate in the mid eighties died at home on a friday night and was found by us late Monday. His cat was locked in the house with him and had eaten most of the front of his face away by then. So much for loyalty. All dog and cat loyalty related to food and the food place.

From around 14 years on I would get after hours work mowing lawns and tidying private gardens as my income was only 5 dollars a week in those days, half of which I gave to my Mum to help the family till I was 21 years old.. and earned around twenty five dollars and ran a car on higher purchase!!
Unfortunately dogs and dog poop was everywhere. On the nature and median strips back and front yards. Several places I mowed had one or two dogs which left some c10 to 20 stinking poops all over the back yards so when I mowed I would come home covered in filthy poop. The dog owners would not shift the poop off the lawn before I came to mow. The mowing of parks and median strips was carried out by what were cylinder...Gang mowers...and the tractor drivers would come back to the depot each night covered in and smelling like dog poop. You could not walk to shops or just go for a walk and not be chased , threatened or seriously bitten by dogs...It was terryfying for young children. Dogs would poop in front of shops and it would be left there for all to walk in and spread everywhere. Other dogs would arrive nuzzle the shipoop...as they still do... that was already there and poop nearby..The postman was often terrorized by all the dogs roaming the streets or homes with no side gate and a low front fence or none at all. I have seen people terrorized by dogs. Children in great fear including my own kids..I have worked for fifty years in local Government and seen the dogs other useless, vicious natural instinctive side and their now dependance on pampered life style but ever reverting to their dangerous instincts if not pampered or given the attention they want. ..Dumbing down both the dogs and the new pampered breed of westernised human..((Look for my next paper titled "The dumbing down of humanity and taking the earth with it".) I have no fear of dogs at all but fear what I might do to them and stupid owners if they attack or threaten me..A proverb of mine in my book.."Carterisms...A proverbial look at Australia"...."I fear nothing but I am very cautious of Great white sharks, crocodiles, tigers, funnel web spiders and bloody idiots".

Read more about dogs in my book from second hand..Abebooks/Amazon...Carterisms...Chapter titled Mutts and Moggies.... A warning over 20 years ago..

9.....BRIEF DOG HISTORY OF ACTUAL USE.

Dog behaviour...Domestic dogs have an inherent pack sense. As puppies they learn their ranking in society, whether it is among their own kind or in a human household. Growing older they take any opportunity to elevate themselves in the social order. If they are thwarted, or worse still downgraded, they are resentful. Preference given a baby...especially in a previously childless household is an affront. The newcomer is seen as a smaller creature that ought to be at the bottom of the pecking order.

Attacks on infants before they reach the crawling and fur pulling stage are extremely uncommon however we know many are not reported because of unhealthy dependence on sly dog and the child is now at the bottom of the list well below the dog.. A disappointed or jealous dog may merely mope, or display a surliness. But it could bite or threaten someone else...perhaps a visitor or passer by. Comment...Dogs and cats in today's society hold greater position in the household than even many family members or visitors and are often spoilt to ridiculous levels....Any one who keeps a dog in the house while raising a baby or allows a crawling child or toddler to handle a dog or play in a dog space with the babes/toddlers habit of tasting everything in their mouth till they are about 3 or more....is an ignorant misguided imbecile. Dog starts off as a dog to lunatic parents....

Staffordshire bull terriers have been responsible for the majority of recent dog attacks in N.S.W. but the State Government left them off its restricted hit list earlier this year...2006.

A daily telegraph analysis of all dog attacks officially reported by local Councils over a recent 16 month period reveals staffies were involved in 279 incidents, more than any other breed ahead of 233 attacks by Pit bull terriers that were restricted by recent amendments.

At least a billion cats/dogs given to fussy indulgent lifestyle by over misplaced affectionate human bimbo's. Prissy little dog and cat owners now on the yellow brick road covered in defecation and gross...

Maru a cat has become a famous sensation on u tube because it jumps in and out of boxes...now a TV star...Gee how bloody amazing is that ..mmm. Dumbing down continues. News story..Dog travels 2 k to find owner at hospital..loyalty..Miracle..."No...just a USELESS hungry fluke combined with the dog probably travelling that way often after escaping many times or on lead and killing the wild along the way...No bloody miracle idiots!! Market stall holder small dolly chawawa wa wa wa wa...dah..Dog doing nothing, rewarded with neck scratch,..back rubbed..back left leg starts to tremble...now patted on rump both dogs back legs start to tremble probably ejaculates...most grateful..dog continues to do nothing...except wants to fight or shag another dog going past..Owner lifts useless into fluffy basket in back of station wagon ..gives dog a nuzzle and kiss...I then vomit amidst controlled laughter...

Big ugly dangerous dog lost in Sydney turns up 9 months later in Melbourne. A miracle.....bulldust...How many hundreds of native creatures has it slaughtered along the way...Another roaming useless dog which Animal agencies conveniently overlook and take the fluffy hero useless view.

New live TV show. Random viewing of dog owners intimacies with their dog and cat...Dog and Cat Cafes..."Cafe flea kennel "... "Cafe canine/feline private moment cafe"... "Scratch piss, shit n sniff cafe." "Cat n dog tables provided..."Cafe Dog lick ".....napkins provided...Photographer on hand for this intimate moment..Flowers can be bought for puppies birthday...Dog nappies available and kitty litter..

Smells optional... Deodorants available for others.mmm." All dumbing down sanitarium" "Living barbie dog doll cafe..Dog/cat movies, TV IMAGES SCREENED EVERY MOMENT EVERY DAY SOMEWHERE!!"..." Dogs for sale..Cafe..Promotable proliferation...Latest hybrid crossings update...Match your stupid with another stupid dog or your own insecurities with another owners subservient ways or secret intimate wishes...via the dog!!! Dog/Cat film star paw signings and parade on the red carpet amongst the dying and contaminated food and everything else.....dont miss it now..The cringing, subservient human media cowl to the dog, the pet industry, the fluff and bubble and promotion of the demise of the wild...Breed more..sell more..more sales and advertising dollars...clever..Invasion by stealth, hype and fluff!!

To watch subservient humans pamper their dogs/cats is so sadly funny and stupid, entertaining..hard not to crack up...Like when people smoke...A workmate once described smokers as they pursed their lips to the cigarette to draw in..."Just looks like a pig with a straw sticking out of its a..e.." Hard to view such and not laugh loudly...Video or TV show of themselves would shame many..The dog is the Captain....(12 10 12..Three people in Bundaberg attacked by pack of dogs all recieved serious puncture wounds..hospital..police investigating.7am news on radio Zinc.) Humans buy a lovely block of land or home then buy a dog to poop and piddle all over it..Blights like cigarette butts. (13 8 12..South Brisbane ...8 year old almost killed by 2 pet American bulldogs...Dogs shot by police..)

The lacerations even from inadvertent dog scratches, let alone deliberate or reckless bites are easily infected.(most commonly by Capnocytophaga ochracea or pasteurilla multocida.)

Factors relating to attack incidents..

Challenging for food or water. Attacking a dog or its companions or encroaching on its territory. Sickness or injury. Failure to recognise insecurity or fear. Intervention when dog fights. Threatening body language. Prey behaviour. Ignoring warning signs. Fear and self defence. Territorial and possessions. Predatory instincts..blood lust.. Redirected aggression.. Trained to attack, protect..None of these should visitors or the public have to deal with from others dogs or their own.

10.....ACTUAL CASE OF CHILD DEATH FROM ATTACK BY DOG..

JULY 30 2012.. Headed.."Fatal Melbourne dog attack leads to fine."

The family of a four year old girl killed by a Pitbull Mastiff say they want their daughters death to be a warning to all dog owners to keep their animals under control..Ayen Choi died when a dog owned by Melbourne man(idiot) charged into a St Albans house last August and mauled her to death as she clung to her mothers leg. In a heart wrenching victim impact statement. Ayens mother Jacklin Ancaito said words could not describe what it was like to bury her beautiful daughter. "I was there and I witnessed my daughter being mauled to death....It was terryfying and I see these images in my head all the time. The dog grabbed Ayen by the face and dragged her from her mother shaking her violently....The dog owner was fined \$14 000 dollars and prompted the judge to request jail terms be introduced as a more appropriate penalty.... and I add with confiscation of all personal assets sold and cash donated to nearest of kin of the mutilated, butchered and killed soul from Dog attacks. By dogs with morons/hoons as owners. RSPCA, PETA + do not put any of this in their fluffy promotions. There are maulings and fatalities that are not reported or offered as statistics. Six year old Shane was savaged brutally in July 1986 by his Grandmothers guard dog as he was helping to unload a truck. The labrador kelpie cross

broke out of a cage and bit him on a leg and above the head.. Microsurgery to repair eye, neck and fascial wounds required more than 100 stitches. QLD Premier Joh was bitten badly by his own dog in 1983. Dog made a mistake he implied... Get real.... Dog was being dog. Veteran channel nine newspaper journalist Peter Harvey was taken to hospital after finding himself in the thick of a dog fight in a Sydney park. He recieved a massive 25 cm wound to the shin. Plastic surgery and skin graft required. Two English bulldogs at a nearby picnic table tried to attack their dog Jake. The dogs were on leashes but not tied to anything...Bull mastif, border collie cross killed 10 sheep just recently.. Local owner of the dogs was arrogant about it.. Two big ugly dogs pushed open gate on country urban fringe road...chased 2 cyclists and attacked....TV News 12 10 12. Dog owner ran out and got dogs away from cyclists.. Dogs then turned and viciously attacked her..Almost killed her.

11.....WILD DOGS...FERALS...

Wild dogs kill native Australian Animals and Livestock..

When you hear the staggering figures of lost lambs and other livestock it is sad and bewildering as the reason they are attacking livestock is because they have already viciously attacked and eaten all the easy wild prey. Now bored and adjusting for blood/the kill, they just slaughter vulnerable creatures such as lambs leaving them and older ewes dead or viciously maimed and in pain and trauma for long periods of suffering unlike outcomes from natural predators to a great degree in the wild..In many cases it is wild airborne predators who put injured creatures out of their misery....Feral dogs love to eat native animals, but diets vary, and they have an insatiable appetite for hot lamb, raw beef, tasty goat, all fresh and on the hoof in the paddock of Australia. These voracious hunters also include the fringe pet dogs that are allowed to roam free in large numbers and easily observed late at night to add to this horrible growing situation, attacking from inherent instinct and blood lust supported by the fluffy city dwellers and fringe bushies degrading ignorant attitudes.

The wild feral dog is the top pest/ enemy for land managers in farm and national park regions in south..east Australia and in many other parts of Australia, from Queensland to Western Australia. In Western Australia the Mayor of outback town Leonora drew attention to the fact that rural economies are being devastated by wild feral/cross breed dogs crippling rural incomes.

Comments posted on U-TUBE and ABC Online wild dog video slide shows, brought many comments over the months, with one cattle producer writing on the 9th July 2010 that wild dogs are killing cattle in unprecedented numbers. It seems with every wild feral/cross breed dog 3 more are born. It truly is an uphill battle. I have lost 17 calves in 5 months and 3 young juvenile heifers....The cows teats were torn from cows feeding calves..."I'm heading down at 4.30 pm, just before dark, and I open the gate, in they go, shut the gate, then I go up and do the other mob....I don't need the dogs to muster...the sheep want to be locked up" The animals are skittish and terrified of all dogs...Note ..Should we really see the return of the proud full time shepherd?...I think so ..Time to get out of the extreme comforts and expectations and protect the flock like a proud 24 hr shepherd would historically have done. Refer some 500 million shepherds who still live proudly that way in many parts of the World..Time to eradicate the wild feral/crossbreed dog menace by all at the coal face.

"I have been trying to make a living as a farmer, and now that my farming activities are basically nil ...I am a full time shooter 24/7 all day..all night'...(Is that not what you do as a protector of your flock?) Some farmers are prisoners on their own farm....(That is how it should be to a degree...time to scale down the wants to the needs..!!!) "There are 19 of 500 ewes and the rest have gone via the wild dog

problem, and as soon as the light of day starts to go, the sheep left want to come back to the paddock around the house...("That tells you heaps about real shepherd care in history and again now...)

Quote.. "They were wiping out every lamb and when they ate the lambs they got the bigger sheep and cleared out 800 to 1000 sheep a year". "I have woken up and found 20 sheep torn to pieces in the paddock". "The feral/crossbreed dogs are not in there to eat-they are there to kill; they enjoy killing and this is what sets them apart from so many other predators- they are not hunting to eat, they are hunting to kill, for fun." Dog fences...are a regional success to preserve both wildlife and farmers. Dogs are responsible for sixty six million dollars of losses primarily through destruction and killing of lambs and calves and maiming cows as well as destroying all the vulnerable wildlife in these ...ever being depleted habitat...and amiable farmland.

12.....RANDOM NOTES...SUPPORT INFORMATION.....

Dogs skills are ..Lay around all day or go hunting things they shouldn't,, bark at everything, run around in circles and jump up and down onto everybody....lick and sniff everything, poop and piddle everywhere ...Will do the odd trick for food and shelter...and tummy rub and will then bite us if our guard is down and there is a chance to steal up the pecking order. Cost thousands of dollars to keep...Trees give us the air we breathe , give us our homes, store poisonous carbon, hold the soil together, make great play structures for our kids, offer great beauty to observe and bring us peaceful moments. Trees make soil to grow crops from their falling branches and leaves, eliminate erosion, keep the salt levels down by drinking from five gallons of water to 5 thousand gallons a day. Home for trillions of birds and insects that pollinate our food plants to allow us to live..Snakes silently without fuss or being seen catch mice and help balance all life. Koalas prune trees with cockatoos to increase available pollen for birds and all pollinating creatures including bees. All the wild carries out a well refined important natural purpose that links to everything that brings us all the real things we need. The earth is the provider with its balanced network being fractured everyday...including the overpopulations of domestic dogs and cats...We are on a fast approaching death row with our matter of fact and careless indifference to the wild , its purpose and our ignorance and damage offered to it. Plus our lack of real united action..Adopt a tree or plant one or many...it is far more sane and far less dumber down..Trees as pets...
...Probable estimate of domestic, stray and domestic dogs gone feral/wild could be as high as 600 million or more world wide.

...Far more dogs now than there were humans when the earth was plagued with disease from poor sanitation...No sewers and pooping and piddling everywhere in the street and yards, parks, countryside.

...Most great thinkers believed the sewerage system was this civilization's greatest achievement...This basically led to all the modern riches we have today from improved health and health conditions.
...Now probably at least 1.4 billion dog turds everywhere each day scattered all over the planet with a potential build up and mutation of bacterial ecoli from their poop n piddle...One of... if not the highest ecoli levels in Dog poop. Add the probable over six hundred million domestic cat poop.
...In Australia Dogs and Cats with some support pets have some 5 billion dollars spent on them annually....with peanuts spent on the preservation of our wild creatures and habitat which are the links to our health and survival...which is our real wealth and can connect for prosperity..
...Dogs and cats with a few minor mixed pets have at least two lanes of an average eleven lane supermarket just to mainly dog/cat and some supplementary products.
...Dr John Wamsley in South Australia had to mortgage his home in order to provide safe wild havens for the last of the native Bilby's from ravaging wild and domestic dogs and cats.
...Pet(Dog and cat) exploiters take little or no responsibility.(The broad industry).
...With volunteer organizations rattling tins in front of peoples noses including non dog owners to pay for

neglected cats/dogs and pet farm animals only to keep the numbers up it seems!!!.

...We are already way past the critical overpopulations of domestic dogs and cats in the world. Hybridised as a throw away consumer item and marketed as the only thing on the planet insecure and depressed people can live with a poor lazy role model..as well as company for children and a dump for parents.
...Expect non dog owners to love all dogs and contribute to their neglect recovery...

...Wild Animals/creatures numbers in the wild decreasing rapidly from the impact on the planet by huge out of control volumes of dogs and cats.

...Koala's and many other native creatures will be gone from the wild within 10 years at current rate of demise attributed mainly to cars, dogs, cats and loss of habitat.

...Burn millions of wild creatures and their habitat annually in the name of fire management/prevention, now a careless, archaic stupid method....We burn the forests to prevent them catching fire!! ...it has a huge comedic, contradictory flavour... There is not enough of the forest left to burn for fire control..The trees give us the air we breathe and takes in the carbon that can kill us..Burning anywhere releases stored carbon. We burn the nutritious fallen leaves and trees, green humus and make the land vulnerable to wind, flood and rain erosion as well as denying the soil the natural nutrition replenishment process. Starving the soil till it is gone....A clear indulgence in apocypse catastrophe by stealth and speeding up of the dumbing down of humanity..The extreme loss of natural build up of soil nutrition from green fall humus slowly eroding to desertification and soil starvation.

...Breeding more hybrid dogs ...Either more dangerous or useless, easilly depressed, insecure , dependant animals that when dumped or not managed well, let loose....will further kill and maim wild life as is still the case and getting worse.

...Useless dogs as seemingly obedient toys for meek, insecure humans or aggressive violent arrogant boofheads.

...Dog shit...Highest levels of Bacterial ecoli of any creature shit.

...Constant push by pet industry via movies, T.V, in advertisements , every day in the papers..then constant fluffy emotional crap to make us buy more seemingly popular pets and products that we have been brainwashed for by human dog/cat sympathisers, advertisers and exploiters to increase their profit margins compounding the dangerous increase in dog numbers.

... Predictable future illnesses, plagues and current probable fringe illnesses spread by dogs.

...Ted Egan speaks of his 10 years on a Mission in the NT...where after 10 years no Aboriginal child lived beyond 5 years old...He ordered the destruction of over 50 camp dogs..as it was realized the familiarity with dogs living with humans was killing the children... could still be a big part of Boriginal health problems.Disintary, worms, eyedatis and other known and unknown fringe illnesses from poor hygeine...and dirty dogs handled all day by children/toddlers/ babes including sharing food and practiced still now by insecure humans in unhealthy, intimate relations/living with dogs. The house now can only be described as a large smelly dog kennel.

...Dogs considered by several old established religions as the dirtiest animals on earth....Historic experience all aligned at times in history with plagues etc...

...Turn of the century following many premature deaths from poor health habits...the dog was kept in the back yard and tied up if guests arrived ,as many illnesses were traced to the dirty habits of the dog and people not washing their hands and dog excreta everywhere for kids to fall in and spread disease.....

(That courtesy not given to visitors today or even business clients)...This was coupled with now growing need for humans to deal in a healthy manner with their own excreta..

...In the 50s, 60s to the 80s, dogs were off the leash roaming and pooping everywhere...All past experience was forgotten...

...In the eighties and early nineties Rippleside beach Geelong with others were closed because of the dangerous high levels of Bacterial e.colli in the water from thousands of dog turds washed off the nature strips into the drains, then into the sea during a flash flood.

...Dog owners assumption that everybody will love their useless little manic fluffy pooping and piddling and sniffing machine....While typing this in Agnes Water internet facility 2 small dogs terrorised a little girl who went to pat one of them...useless pieces of crap. A Doberman on a lead in an internet Cafe growled, raised its mane and threatened a child...The parent of which then threatened to bash the dog and owner with a baseball bat if it harmed the child. Dog owners and others there said the dog was harmless after the family left..I then erupted and called them all dumb wankers and said I would help the parent find a baseball bat....if his child was harmed..Moronic, ignorant, prissy, stupid weak cringers.

...Announced today...28.4.12 that Koalas have been upgraded to the endangered list..Loss of habitat, Dogs, Cars the responble culprits...with the stupidity and lack of care by humans..and the indulgence in useless cats and dogs in the big picture..to support frail, weak,insecure, seemingly dumb human civilization.

...Promotion of the uselessness and dumbing down of humanity...Paris Hilton and her little fluffy in a small bag as an accessory.."If you took a chewed rotting T bone steak , put it in a Moccasin , added two smarties for eyes and a peanut for a heart ...this would be more use to the planet than both Paris and her dog put together". Both offering nothing...

...A wild Goanna would respond with the same affection if given a good daily feed, bed, massaged, patted and fondled daily, tummy rubbed for an hour or two each day. Lifted onto the couch, chairs and sleeps with you on your bed. Thousands of dollars on medical attention, insured against injury and sent on pet holidays...poops anywhere it likes, eat anything it likes or be ridiculously fussy. Leads its owner like a donkey while out for a walk, sniffs all other humans and places for poops, piddles, balls, dick, sex, shagging, dead creatures, other smelly dogs and rolls in all the poop it can then walks it into the house..Licking toddlers and owners after it has licked its own or anothers a..e...Help it with its sex life and breeding, wank it if encouraged enough with overly affection..Eats better than a third of the worlds human population and kills, eats and terrorises, wild creatures, farm animals, others pets and many human beings...Will do useless tricks if food is offered as an incentive. Offered more affection than other family and human partners...How smart are we ...how gullable and stupid are humans...We the dogs are on the cusp of taking over the world...We have gone from moving doll pet, to master of the earth and indulged in the dumbing down of humanity with human failing and the quest for the dollar the vehicle.

...Many cultures rightly treat dogs as probably the dirtiest creature on the planet..(Muslim faith a third of the worlds population)Others eat them.(500 000 for food in South Korea "All pooping")..Others spend hundreds of billions of dollars on their stattus, manicuring while a third of the worlds human population starves and world wild life decreases rapidly by overpopulation of dog/cat numbers and spoilt dog habits spreading into wild habitat...

...Good uses...yes, Police dogs, Drug sniffers, Seeing eye dogs, farm stock management/protection, droving dogs, many more...Companion for health reasons after all else fails.

...Sad that dogs are considered as companions as humans tolerate or care about each other less and less. Less quality affection and carressing with kind words, caring, hugs, love, gentle hand to children, family, partners and friends.

...Spend billions on feeding a world of dogs in overpopulated numbers. Focus now on assistance/love/caring on helping feed other human beings and threatened/edge of extinction species. At our current biasse and self interested rate, more than two thirds of creature species and plant species will be eradicated swiftly...Thanks for nothing...Be aware of and re--focus on the earths need for all or pay the price and dont BLOODY winge.

...Maybe give the patting, tummy rubbing and affection to partners, family and friends who are probably crying out for it now....You sad insecure turds...Be happy and show it. Do not breed any more poor useless hybrids to replace your inability to be a real caring, useful human being ...You are all possibly capable of living life without Mutt or Moggie..

...If ever there was a time in history where the numbers of one creature is poised to bring plague casastrophe to the human race and the health of the earth it is now .There are probably more cats and dogs now than flies, fleas, rats ticks and mice...mmmmmm

... DOGS MAINTAIN THEIR VICIOUS HERITAGE DESPITE FLUFFY HYBRIDIZATION BY PET EXPLOITERS....or because of same!!

...If a dog is ignored by any human being it cringes ,winges like spoilt human beings, sulks away waiting for a chance to attack in its own way or will re-act viciously immediately...particularly with children..

...The rising number of attacks notified and not, make this clear, especially with children of the same size or less who are always in danger in the company of others and food with a strong tempered spoilt dog...by its owner or not..Or maultreated animal.

...The risk of bacterial infection from dog bites, licking, patting has not yet been fully known or evolved.

...Dog turds on nature strips closing beaches/waters following flash floods...Rippleside beach Geelong several years ago.

...Dog turds threatening health of all life.

... Fringe unknown burgeoning diseases to toddlers playing with dogs anywhere. Poor parenting. All the mystery diseases killing young children and their story shown on TV often show the deceased toddler playing in the yard with the dog...or in the house with the dog...The dog does not rinse its filthy mouth out after it licks its own or anothers a...e!! It doesnt bath after it has rolled or walked in its own poop in the yard...We have short memories...

Many people died very young around the turn of the century and before because of our poor sanitation habits and foolish handling of dirty dogs...Cemetaries full of them.....My parents generation changed this...This civilization is to stupid with clever to think..dahhhhh. Avian flu mild in birds, death to humans, the equine virus killing humans and horses and infecting dogs..In the congo 50% population with HIV. Monkey pox kills 10% of the nations population..mainly infected by animals..squirrels , monkeys and what else..mmm. Human to human spread inevitable. Urbanisation dangerous with to familiar dog/cat cohabitation practices. New viruses evolving all the time....HIV world wide pandemic..Diseases currently and historically infected and spread in dogs.. Only a matter of time ..maybe within 10 years. The first infectious cancer now recorded in Tasmanian devils....The smallpox virus spread by mosquitoies kills one in 3 affected...10 million people a year. HIV has killed 35 million people to now....no age limit. Humans

living on the edge..Swine flu...Human, bird, pig..combined..Swine flu spread rapidly to every country..because viruses do not wish to kill all their hosts..it was "Mild calamity".. When will the next serious pandemic be in this wonderful illusionary, fractured dynastical environment we have created and contaminated beyond mistake.? The dog and cat is the fast burgeoning, DISEASE CARRYING, fractured wild replacement for all the wild and habitat... Keeping crippled and all unwanted dogs and cats alive is bringing the demise of all the useful, beautiful creatures and plants to swift end...Dog and cat via consumerism and fluffy advertisements, movies with human empathy for short penash with fluffy pets. Buy one with oohs and ahs and after 6 months the house and garden is torn apart, piddling and pooping everywhere and another \$50 a week to keep with all the doggy toys, it is usually left to one or none to take care of it in its not fluffy moments while really doing nothing useful at all. With ever increasing demands to your ultimate subservience to this waste of space. There is more spent on spoiling dogs and cats in some countries than some other countries have GDP....Gross domestic product.

Remember 1960s 1980s...20 turds to a nature strip and dogs roaming everywhere...When dog owners approached me with their dog running loose and charging towards my groin, I would yell at the dogs owner...."Keep your dogs nose out of my groin and I will keep my nose out of yours...!! Always stopped the dog and owner in their tracks ...whatever gender.....from book "Carterisms"....

...I remember around 1975 when everybody with a dog walked it without a leash and let it shit on everyone elses nature strip...There would often be some 15 to 20 dog turds on one nature strip..often in line with your front gate...Though the worst of all this poop has dissapeared off most of the nature strips it has not dissapeared altogether..and increased to potentially 1.3 million a day world wide. A neighbour of mine in the seventies, who requested often a passer by, with dog, to stop it pooping on his nature strip and was always ignored.... saw this dog owner look out his front window to find a man squatting and crapping on his nature strip...It was worth the 300 dollar fine he informed me with a smile. Many now pick up the dogs crap in a plastic bag which is considerate..But the 1.3 million dog poops do not go away. Those in bins in bags just ferment waiting to release some highly toxic bacteria or ghost infection....To many dogs.

...A dog is a critter for most..for varying reasons and yet they would be better off having a dead straight stick or a pet rock for support for their insecurities. Less cost, danger, inconvenience, impact on the planets equilibrium and health.

...Spoilt, unbalanced dogs evolving seriously contribute to the general reduction and degradation of habitat for all other life, with cats.

...The dog and cat are just another CONSUMER ITEM...computer game, can of beer, glass of wine, lounge chair, motor car, TV...another throw away exploited consumer item that replaces the doll, teddy bear, dolly, child that is seemingly missing from an insecure mind. Our TV, movies, newspapers, radio, charity organisations flood our lives with the fluffy big eyed ...Japanese peekinese give me a break!!!!...pampered plight of the dog...spending millions on promotional ways of brainwashing us to demand a dog for all seasons, where they make five billion dollars alone in Australia, then expect the consumer to pay for their poor treatment...with 2 lanes of each supermarket given over to mainly dog and cat products...Probably more than a hundred billion dollars spent world wide on dog and cat comfort...While individual humans mortgage their house and risk their lives to save remote unfavourable to human creatures and 1.5 billion people do not have access to the nourishing food pampered cats and dogs recieve daily. An infestation of dogs with an asumption all want and love your dog...Adopt a dog....yeh!! Yeh attack human sympathies to take on a dog at cost of responsibility which most families cannot afford as the dog becomes a permanent slumber party and focus of all attention denying children

and parents the comfort they really need. Now focused on the dog or the dog causing economic and destructive pain....

...Dogs/cats in outrageous unmanageable numbers become worthless social accessories. Another modern security blanket for insecure bland modern pampered humanity by the false reality...thus ensuring the shifty, silent demise of all other useful creatures on the planet. We are the perpetrators of our own demise and impatient thoughtless lifestyle...All previous experiences/lessons ignored.

...Histories largest catastrophic disaster as archeologists discover in 500 years time this great dynasty like all the others collapsed and wiped out by the inbalanced "Molly Coddle dog plague" coupled with speedy food shortage and plague starvation and disease....no resistance as all other probable cures driven aside by land clearing and the pamper support system to the dog and spoilt ways.

...Dogs, cats, foxes, humans have wiped out many large and small creatures and continue to do so...to ultimate destruction of most smaller creatures particularly up to Koala size...Many people trying very hard in many areas to save many but the general populus dont care and to indifferent. With loss of food supply all will dissapear as the dog, cat, fox and human beings kill and eat everything else. The final dumbing down of humanity. The pollination of all our plants/food is now threatened... by the ignorant power and greed by temporary citizens/fatalists.

...Many millions of wild dogs/cats from human neglect is of a criminal nature.....

...Some 30 years ago health authorities estimated 3000 people would be dead if Rabies got into the country before anything could be done to slow the disease down. All because of the wild/feral dogs, cats, pigs, goats, and all other feral creatures.

...Why do humans have a cat or a dog? To prop up their often high sad levels of insecurities..be in command and yet end up subordinates...as nearly all their actions and company with dogs is a complete one way street of subordination and weakness as these humans dont know how to be kind, compassionate, understanding or tender with other human beings or dont want to..The creepies, crawlies, that are now vulnerable threatened unpopular wild life.. Humans do like giving orders to something..

...Walking the dog is just for it to poop, piddle, sniff everbody else up for poop, piddle, fanny, balls, turds, dick, dead smells, rotten smells, shag, other dog smells on people, roll in the rotten, nuzzle its nose into other dogs ar..s n fannies and their turd ...then walk the dog home to where the children play and the new born baby lives...Are we lunatic idiots. Can't we go for a walk without only going because, we take the dog for a walk to conduct all these obsenities and pamper further our insecurities and weaknesses...Find something environmentaly and mentaly freindly as a shoulder or crutch please.....The dog leads, which is not surprising as the owner/human becomes dumb and dumber and more subordinate...The HUMAN DOES NOT NOTICE THE WILD DISSAPEARING AS THEY ARE NOW TOTALLY FOCUSED ON THE ONE FLUFFY, BIG EYED THING ...THE DOG, THE CAT...AND THEY DONT WANT TO BE SYMPATHETIC OR EVEN THINK BEYOND THE RIDICULOUSLY FLUFFY,PAMPERED POOCH. The owners just say.." Oh fluffy just wants to smell you to say a friendly hello or connect .."What bulldust and wank.. it is just being gross and filthy to others and you condone it...idiot.

...Most of owning a dog is about false status anyway...In one year in the seventies Afghan hounds were popular as "The trendy" beautiful dog to own..Spread them out in front of the log fire it made a wonderful yuppy impression for visiting friends...In that year after the hype and novelty had worn off after Christmas, 500 unwanted Afghan hounds were put down. To big, ate to much, vet costs, annoying neighbours, pooping everywhere but in their own yard. Wrecking back yards and furniture to big, clumsy and dangerous near/around small children, impossible to manage properly on a lead for those who

wanted their dog on a lead. Could and would break out of small back yards..wrecked gardens in public parks...There was also a "Great Dane" period also that ended up the same. People also screaming poor and trying to raise kids but spending \$50 to \$100 a week or more on a monster dog equivalent to the costs of keeping a bloody horse or Ellephant!! Conducted as the dog acting as baby sitter to the small children rather than spending quality time with your kids or patting and massaging for good periods your partner with love and affection.

...Dogs n cats ...company that does as its told...ultimately doing as it likes often as an imposition on others and the habitat and wild life including sealife..The huge HUNDRED billion dollar and more world wide pet industry pulling down the forests to grow food and land for meat and other products for overpopulations of pampered consumer items cats and dogs...ready to rule the world or destroy much of it soon...and scouring and depleting the seas and rivers for seafood to feed 1.2 billion cats and dogs while 1.5 billion humans live in serious poverty and cannot get anywhere near the nourishment dogs and cats get from the supermarkets and other providers.

Many say.."Love me love my dog" It makes my decision easy for inbalanced grasping people. I won't want to visit if you have a house dog. Don't visit me with your dog ...you and your dog will be told to rack off.....

...Give a dog a home, two hours of tummy rubs and patting a day, warmth of your lap, expensive feeds better than your kids are getting with more thought often..Average \$20 a week or more veterinary fees/costs, sleeps on your bed ,on all the furniture, sits up at dinner table, licks your dinner plates clean, carry it everywhere, lift it by its fat a..e by your fat ar.. or lazy obeying body up into the lounge chair or the car...Licks everything after it licks its a..e and balls, rubs its wormy a..e accross the lounge carpet where the toddlers play..You put the toddlers out to play in the yard where the dog has poop all over the place with the ever contaminated dog.Take it everywhere assuming everbody loves your dog that has a natural instinct to bite anything that makes it anxious especially small children in the street and worse, your own children in your own yard...refer figures available. One in six people in the world today already have no access to neccesities such as clean drinking water, food and sanitation.

...Most people would honestly love the sort of misplaced affection constant and ridiculously overwhelming offered to dogs...n cats who want more and more all the time...Dogs and cats only give you that affection for reward of food, and shelter with affection you nits!!.....

If you did not feed the dog or cat for a week and left the gate open it would be gone to the first one who fed it for more than 2 days in a row.....If you died and either cat or dog were locked in the house with you for a few days without food it would start eating you very soon...examples available. If we offered the same affection, time and budget to each other and all wild life on a daily basis...the world would be much better off. No one is going to leave you if you expensively feed them every day, house you on the bed in the master bedroom, let you sleep with them turning the bedroom into a smelly dog kennel, unnoticed by your now contaminated sense of smell, have everthing in the house available to them , rub their tummy for at least half an hour each day, pat you when you do a poop in someone elses place, buy insurance to make money from your demise, pay hundreds of dollars for dog wash, pamper pooch clip and massage!! Spend a fortune on vet fees to keep you around, laugh when you wreck things, dig up and poop all over the back yard, poop and piddle in the house while a puppy..up to 2 years..mmm, take you for a walk literally, actual and pseudo masturbation...mate you with another ugly stupid hybrid.. All
